Top 30 Pathways (Sorted by FDR)
GO:CC − cell periphery
GO:CC − extracellular matrix
GO:CC − external encapsulating structure
GO:MF − signaling receptor activity
GO:MF − molecular transducer activity
GO:MF − transmembrane signaling receptor activity
GO:CC − extracellular region
GO:CC − collagen−containing extracellular matrix
GO:MF − G protein−coupled receptor activity
GO:BP − system process
GO:BP − multicellular organismal process
GO:MF − extracellular matrix structural constituent
GO:BP − cell communication
GO:MF − signaling receptor binding
GO:BP − nervous system process
GO:CC − collagen trimer
GO:BP − positive regulation of signal transduction
GO:BP − circulatory system development
GO:MF − extracellular matrix structural constituent conferring tensile strength
GO:BP − positive regulation of cell communication
GO:MF − neuropeptide receptor activity
GO:BP − positive regulation of response to stimulus
GO:BP − signaling
GO:BP − response to chemical
GO:BP − cellular response to lipoprotein particle stimulus
GO:MF − heparan sulfate proteoglycan binding
GO:BP − G protein−coupled receptor signaling pathway
GO:BP − positive regulation of cell differentiation
GO:BP − regulation of response to stimulus
GO:BP − response to stimulus
