## 1. Read the count data

In this section, we will read the clean count data from the `synaptosomes_miRNARNA` folder. The data is stored in the format of `.csv`. We will read the data and filter the columns based on the condition list. The final table will be stored in `results/02-DEM-Vehicle/DESeq2_results.csv`.

## 2. Differential expression analysis

In this section, we will perform differential expression analysis using DESeq2. We will compare the 22q vs Control in the vehicle condition. The results will be stored in `results/01-DEM-TTX/DESeq2_results.csv`.

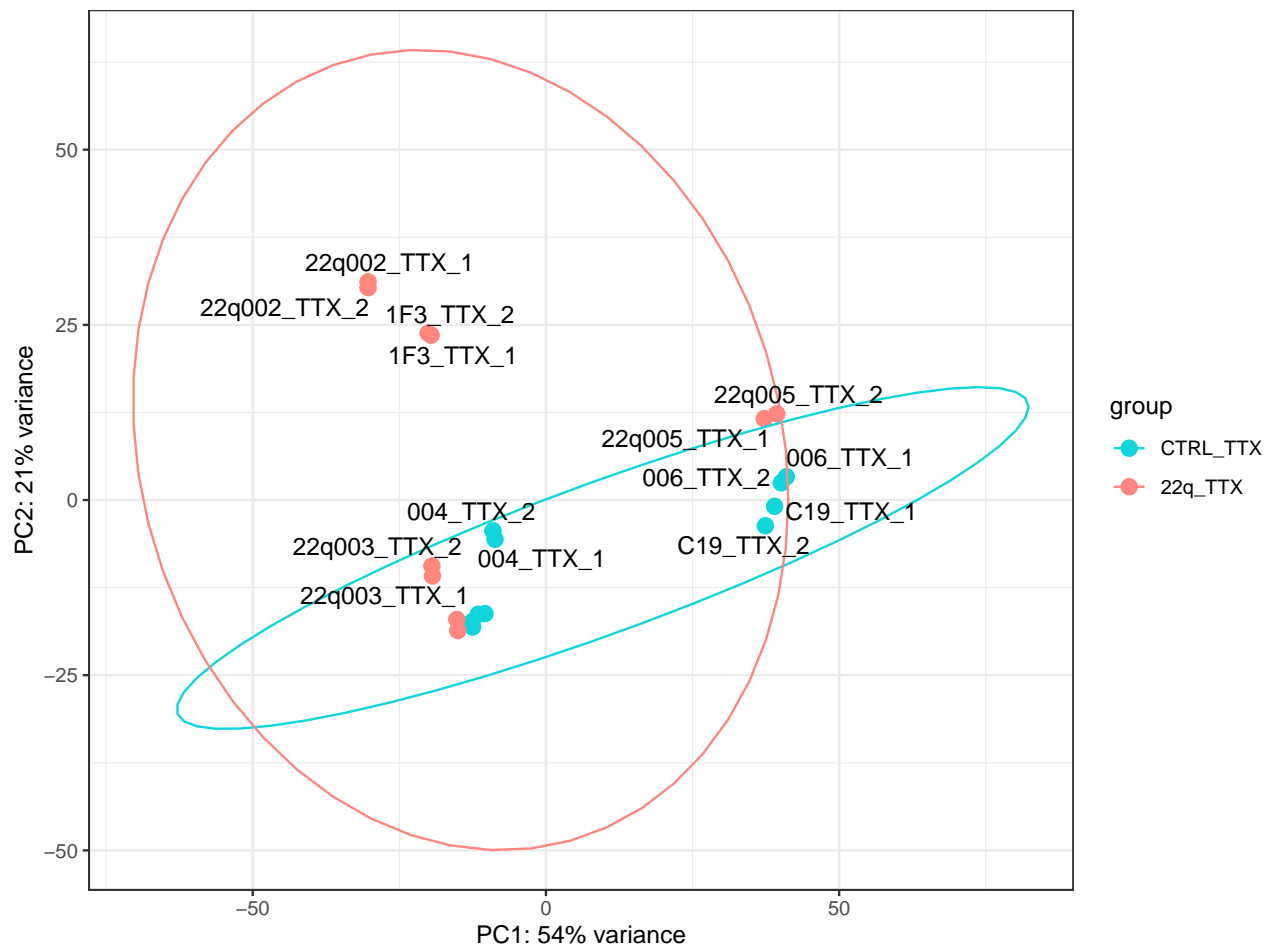

### 3. Visualization for reuslt

#### (1) Sample information
